**Operation:**
- Insert a 9V battery (2) or connect a regulated 9V power supply adaptor to the DC jack (4).
- Connecting an instrument to the input jack (3) will automatically switch the unit on.
- Connect your amplifier to the output jack (6). Select your desired sound with the 5 control knobs (7, 8, 9, 10, 11). (see Sound examples)
- Adjust the threshold of the internal noise gates with control knob N-Gate (13).
- Pressing the pedal (1) switches the unit on or off.
- Instead of using this unit on the frontstage, you can place it with your equipment and control it with a standard momentary footswitch connected to the remote jack (5).
- Before changing the battery (2) always unplug the input jack (3) to switch the unit off.
- We suggest to use a regulated 9V power supply adaptor to keep our environment clean.
- Power supply specifications: see imprint on bottom of unit. - Thank you.

**Important notes:**
- Avoid using this unit in extreme humidity, heat or dust environment.
- When the unit is not in use for longer periods, remove the battery (2) to prevent damages by battery leakage.
- Also unplug the input (3) to prevent wasting battery life when the unit is not in use.

**Function:**
- **(3) IN jack:** Inserting a plug switches the unit on.
- **(4) 9V DC jack:** Connect a regulated 9V power supply unit.
- **(5) REMOTE jack:** The ON / OFF-function can be remote controlled by a momentary switch, connected to the REMOTE jack (5). Intelligent switching devices (like the Nobels MF-2 or MS-4) also can remote control the unit.
- **(6) OUT jack:** This output delivers a low impedance output signal best for the input of your amplifier.
- **(7) DRIVE control:** Adjust this control to get your **Xtreme** drive.
- **(8) LO control:** Adjust this control to get more or less bass.
  *Attention: **Xtreme** powerful! Pay attention to your loudspeakers!*
- **(9) X-MID control:** "Doublepeak control!" Adjust this control to get more or less amount of **Xtreme**-mid frequencies.
- **(10) HI control:** Adjust this control to get more or less hi-frequencies.
- **(11) LEVEL control:** Adjusts the volume.
- **(12) LED:** This Led shows the state of the effect. LED on = Effect on.
- **(13) N-Gate Regler:** Adjust this control to select the desired threshold of the internal noise gate.
